**i2t2 infrastructure Transformation Services**

## ABOUT US

i2t2's infrastructure consulting works with the client to implement their business goals. We have a strong team of technology professionals capable of delivering swift and measurable results. We help clients in developing the strategy, create roadmap and provide appropriate technology solutions.

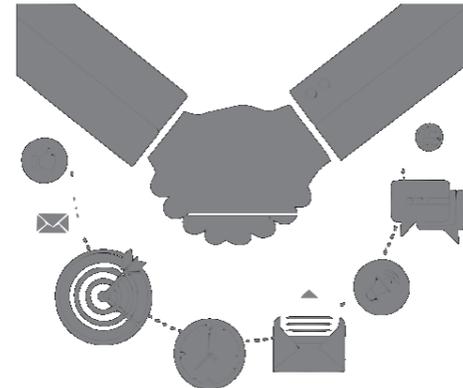

We build infrastructure to meet the required SLAs (Service Level Agreements) and we always ensure that the solutions are aligned with the BLAs (Business Level Agreements)

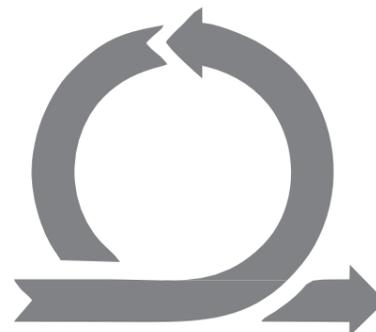

Any transformation effort must focus on improving business effectiveness. The key drivers identified for an IT enabled business environment are:

## SERVICES

- Agility to deliver new products
- Versatile and mobile delivery platforms
- Secure environment, working within compliance
- Availability of the service
- Minimize the disruption to business
- Greater efficiency Reduced

A business driven IT Transformation strategy is instrumental in creating suitable roadmap and maximizing the return on investment.

## Key Points driving the Infrastructure transformation are :

### Current

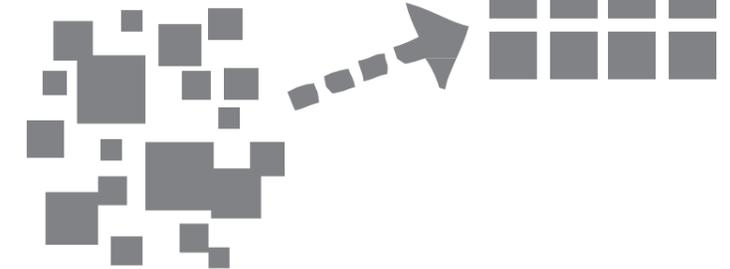

Aging hardware unsupported  
Software, Risk of unknown  
security threats exorbitant  
support costs

### Future

Agile  
Secure  
In-house Vs Cloud  
Mobility  
BYOD  
Big data  
IOT

i2t2 aligns its Infrastructure transformation service to address all of the requirements through consistent visibility to the above demands.

The need to deliver new customer driven experience is growing. The demand for change is more frequent and turnaround time is shorter.

i2t2 helps organizations building their infrastructure that is ready for Agile delivery.

i2t2 considers existing people, process and tools environment in its transformation analysis and adjusts its approach to deliver expected results.

Following six steps are the key contributors for the successful implementation of the Transformation projects.

**Discover:** Know what you own

**Analyze :** Understand the relationships between business process, applications and infrastructure

**Plan :** Develop a strategy for minimal business disruption and deliver on time

**Build :** Prepare the tested and validated environment to support the future design

**Migrate :** Move the applications and IT services to agile, secure and robust environment

**Operate:** Support the environment efficiently
